DIRECTIONS FOR USE: For most residential spas with normal bathing loads, treatment should be made once each week at the rate of 1 oz. per 625 gallons of water. More frequent treatments may be required in commercial or public spas with heavy bathing loads; i.e., up to twice each week. Apply SPA-KEM™ NON-CHLORINE SHOCK evenly throughout the pool with the pump and filter operating. Add the total amount at one time using a clean plastic scoop. Do not use metal scoops; contamination from a metal scoop will cause decomposition of SPA-KEM™ NON-CHLORINE SHOCK. Application should be made with no bathers in the spa. SPA-KEM™ NON-CHLORINE SHOCK contains no chlorine, you only have to wait until the application is dispersed before re-entering the spa.

STORAGE AND HANDLING: Do not mix SPA-KEM™ NON-CHLORINE SHOCK with other chemicals. Always store in the original container with the top sealed in a cool, dry place and away from point sources of heat, i.e., radiant heaters or steam pipes. Never store in an open container. Avoid contamination of any kind of the opened product. Product that is exposed to heat or contamination may suddenly decompose and release noxious fumes. In case of fire or decomposition condition (fuming product), deluge with plenty of water to control the decomposition. Carbon dioxide fire extinguishers will have no effect on decomposing SPA-KEM™ NON-CHLORINE SHOCK.

DISPOSAL AND SPILL PROCEDURES: Product that cannot be used should be dissolved in at least a 10-fold excess of water (on a weight basis) in an open container and disposed via a treatment or other suitable system in accordance with all local, state and federal environmental laws, regulations, standards and other requirements. Consult with the appropriate agency prior to disposal. Do not reuse empty container, place in trash collection after thoroughly rinsing with water. Do not contaminate food or feed by storage, disposal, or cleaning of equipment.

HAZARD STATEMENT: Health: Airborne dust may be irritating to eyes, nose, throat and skin upon contact. Inhalation of airborne dust at high levels may produce shortness of breath in allergic persons.

FIRST AID	
If In Eyes	Hold eye open and flush with plenty of water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor if irritation persists.
If on Skin or Clothing	Take off contaminated clothing. Rinse skin immediately with plenty of soap and water. Call a poison control center or doctor if irritation persists.
If Inhaled	Move person to fresh air. Call a poison control center or doctor if breathing difficulty or discomfort occurs.
If Swallowed	Drink one or two glass of water to dilute. Do not induce vomiting or give anything by mouth to an unconscious person. Call a physician immediately.
Have the product container or label with you when calling poison control center or doctor, or going for treatment. For assistance call 1-800-767-7665	
Note to Physician : Probable mucosal damage may contraindicate the use of gastric lavage
