

# VOLUNTARY RECALL NOTICE

Kem-Tek Pool & Spa Care Chlorinating Liquid (EPA Reg. No.: 7616-45)

2x128oz Pack

LOT: 16 175 XX:XX C (printed on the long sides of the carton and on the top of the bottle)

KIK Pool Additives Inc. is recalling certain units of Kem-Tek Pool & Spa Care Chlorinating Liquid. This product is sold in a case, containing two bottles. The contents of the bottles inside the case are chlorinating liquid, but **certain bottles** are incorrectly labeled as Kem-Tek Pool&Spa Care Swimming Pool Muriatic Acid. The outer package correctly identifies the contents as chlorinating liquid. Consumers who have not yet used the product inside a carton of Kem-Tek Pool & Spa Care Chlorinating Liquid with lot code **16 175**, should return the product to the store

location where purchased for an exchange or full refund. Only units of Kem-Tek Pool & Spa Care Chlorinating Liquid bearing lot code 16 175 are subject to this voluntary recall.

We want to emphasize the importance of following all warnings that appear on the labels (including not to mix this product, bearing lot code 16 175, with chemicals). In particular, this product should not be mixed with muriatic acid as such use can create a hazardous gas that can cause serious injury and may be fatal.

The affected units were sold at certain Lowe's and Orchard Supply stores, from June 24, 2016 to July 4, 2016.

No injuries or incidents have been reported.
